

# Study reveals key genes involved in production of industrial enzymes and biomass recycling

August 2 2022, by LIU Jia

Growth of *T. longibrachiatum* LC and its cellulase hyper-producing mutants (LC-M4 and LC-M16) on agar plates after 3 days of incubation. A Comparison of colony diameters between *T. longibrachiatum* LC, LC-M4 and LC-M16; B photographs of *T. longibrachiatum* colonies on avicel and CMC-Na plates. \*p
