

Uncertainty is a key factor in the relationship between work injury and mental health, research shows

August 28 2024, by Patrick Lejtenyi

Funnel plot (a and b) and contour enhanced funnel plot (c and d) of weighted average correlation coefficients. Note. Black dots = observed studies. Light dots = imputed studies from trim-and-fill method. For contour-enhanced funnel plots (c and d), white shading = $p > .05$; dark gray shading = $p = .01$; light gray = $p = p$
