A picture taken in 2007 shows the Ericsson Group headquarter in Kista, north of Stockholm. Swedish telecom equipment maker Ericsson said on Monday it had won a contract to supply Danish operator TDC with a fourth-generation (4G) communications network.

Swedish telecom equipment maker Ericsson said on Monday it had won a contract to supply Danish operator TDC with a fourth-generation (4G) communications network.

"Ericsson will roll out a complete [4G/LTE](#) solution, including radio access and core network equipment, as well as managed services," the company said in a statement.

Fourth generation mobile phone technology was introduced in late 2009 in Stockholm and Oslo by operators TeliaSonera and [Ericsson](#). But its debut has been partially hampered by the absence of telephones compatible with the new standard, which has meant that the offer has been limited to [Internet access](#).

Industry analysts have said the real breakthrough was not likely until 2012-2013.

LTE technology, which is to gradually replace Third Generation systems, enables faster access to mobile Internet services and should support the
