According to T-Mobile, the Galaxy S 4G will be the fastest smartphone running on America's Largest 4G Network. Powered by Android 2.2 (Froyo), the Galaxy S 4G is T-Mobile's first smartphone capable of delivering theoretical peak download speeds of up to 21 Mbps, delivering rich entertainment experiences at even faster speeds through its brilliant Super AMOLED touch screen display.

T-Mobile's 4G network, America's largest 4G network, is currently available in 100 major metropolitan areas, reaching approximately 200 million people nationwide. With aggressive plans to expand and double the speed of its 4G network in 2011, T-Mobile expects that 140 million Americans in 25 major metropolitan areas will have access to these increased 4G speeds by midyear.

"With Galaxy S 4G, T-Mobile will deliver its fastest [smartphone](#) yet on America's largest 4G network, providing rich entertainment virtually whenever and wherever consumers want," said Cole Brodman, chief marketing officer, T-Mobile USA. "And with 4G data plans from \$10 per month, we're making blazing-fast 4G speeds and super smartphone
