

NRA triggers furor with its shooting-range app

15 January 2013

A man plays the newly released National Rifle Association (NRA) iPhone/iPad app, "NRA: Practice Range" on January 15, 2012. The National Rifle Association, which blames video games in part for mass shootings, triggered controversy Tuesday after coming out with its own video game for iPhones and iPads.

The National Rifle Association, which blames video games in part for mass shootings, triggered controversy Tuesday after coming out with its own video game for iPhones and iPads.

"NRA: Practice Range," released Sunday, is billed as "the NRA's new mobile nerve center" with access to information about gun safety, legislation and news from the influential four-million-member US gun lobby group.

But its main feature are shooting ranges—some with vaguely coffin-shaped targets—and a choice of handguns, rifles and shotguns, including the type of assault rifle used in the Newtown school massacre in December.

Players have one minute to pick off as many targets as possible, then post their scores on a leader board open to all.

"Is this some kind of sick joke?" wrote one customer in the review section of the game's App Store page.

A man plays the newly released National Rifle Association (NRA) iPhone/iPad app, "NRA: Practice Range." The game gives users choices of several types of weapons and targets to shoot at, simulating firing at a gun range.

"The NRA complains about violent games and then releases one a week later. Sure you're not shooting at humans but does it really matter? F***ing ridiculous."

But in a reflection of how guns divide Americans, others gave the app five-star reviews. "Freaking awesome," wrote one satisfied customer. "Better hurry and download this before they take it away from us," added another.

The game's release coincided with this week's SHOT show, an annual trade show for the shooting, hunting and firearms industry, organized in Las Vegas by the National Shooting Sports Foundation, a gun industry trade group.

The foundation happens to be based in Newtown, Connecticut, where Adam Lanza, 20, cut down 20 six- and seven-year-old children and six teachers at Sandy Hook Elementary School on December 14.

Lanza—who had earlier shot and killed his mother, owner of the Bushmaster assault rifle used to kill the children—also took his own life in one of the most worst [mass shootings](#) in US history.

While President [Barack Obama](#) launched a task force to look into tougher gun laws, NRA executive vice president Wayne LaPierre blamed "vicious, violent video games" and the wider entertainment industry for such bloodbaths.

Separately, 52 percent of respondents to a Washington Post-ABC News poll said the Newtown shooting had made them more supportive of gun control, according to the findings published Tuesday.

The poll also found broad support among both Democrats and Republicans for mandatory background checks for those who purchase firearms at gun shows. Such events are said to account for 40 percent of all US gun sales.
