Dutch police closes probe into fatal Tesla crash
9 September 2016

Dutch police closed a probe Friday into a fatal crash involving a Tesla, accepting the US electric car firm’s findings that the Model S sedan was not on auto-pilot when it smashed into a tree.

Tesla said the driver—who was killed in the accident—was in control of the car which crashed at high speed near the central Dutch town of Baarn on Wednesday.

Police spokeswoman Thalia Luckel said the US manufacturer, which has a plant in the Netherlands, had informed them of its findings.

"We do not dispute the results," she said in a statement adding that as a consequence "prosecutors indicate there will be no criminal probe".

"The police will not investigate any further circumstances surrounding the accident," Luckel added.
collision. The system may be overridden by the driver.
