

Small earthquake rattles California coast near Santa Barbara

23 April 2017

A small earthquake has rattled parts of the Southern California coast.

The U.S. Geological Survey says the magnitude-3.6 quake hit just before 11 a.m. Sunday about 3 miles east of Santa Barbara.

A sheriff's dispatcher says there are no immediate reports of [damage](#) or injury.

The [geological survey's](#) website had hundreds of reports of people feeling the shaking nearly 60 miles to the north in Lompoc and as far south as Los Angeles County.
