

SAP unveils big push into French tech start-ups

22 January 2018

SAP announced plans to invest in French start-ups

Europe's biggest software company SAP on Monday said it will spend up to two billion euros investing in and nurturing French start-ups as part of its push into cutting-edge technologies like artificial intelligence.

The move by the German firm comes as France is increasingly emerging as a leading hub for tech innovation, boosted by President Emmanuel Macron's efforts to promote the nation as open for [business](#).

"There is a real sense of economic momentum in France," said SAP chief executive Bill McDermott after Macron hosted talks with some 140 business leaders at the Versailles chateau near Paris.

In a statement, SAP said it will spend 150 million euros (\$180 million) annually over the next five years on research and development in France.

It plans to focus its efforts on emerging areas such as [artificial intelligence](#), machine learning and blockchain—the technology that underpins bitcoin.

SAP also said it would open an incubator in France, its second in Europe after Berlin, that would nurture over 50 start-ups and give them access to SAP's software and cloud computing operations.

It also promised to invest in early-stage ventures looking for their first seed money, and said it had already acquired the young French venture Recast.AI that builds so-called "chatbots".

Without giving a breakdown of its planned investments in France, SAP said overall it "estimates a more than two-billion-[euro](#) spend over five years".

Other firms attending Macron's business summit in Versailles also unveiled new spending plans.

Facebook said it will pour an additional 10 million euros into artificial [intelligence](#) in France by 2022.

It also pledged to train 65,000 people in digital skills in free schemes to help women set up businesses and the long-term unemployed get back to work.
