

Aussie cops to the roo-scue as kangaroo caught in surf

28 October 2018

While known for their jumping prowess, most kangaroos are also capable swimmers although they rarely take to the water

A kangaroo that hopped into the sea for a dip at a Melbourne beach had to be rescued by Australian police and brought back to life with CPR, officers said Sunday.

Officers said they were called to Safety Beach in Melbourne on Saturday afternoon amid reports the native animal was struggling in the water.

When they arrived, the roo had already made its way back onto dry land and was on the sand covered with a blanket by a beachgoer.

But as they approached, it suddenly turned around and bounded back into the waves.

"It began to swim but got into difficulty in the swell and breaking waves and went under water a couple of times," Victoria Police said in a

statement.

Two officers jumped into the water and managed to bring the marsupial, by now unconscious, back to a grassy area and resuscitate it using compressions.

They did not use the "kiss of life"—mouth-to-mouth resuscitation—a Victoria Police spokeswoman told AFP.

The [wild animal](#) was then brought to a [police](#) station and after an assessment, officers said it was "in good spirits and lucky to be alive given the amount of saltwater he inhaled".
